

Product Info

The T2 Box truss is a super strong and rigid truss for its relatively small form factor – meaning you can hang more, span longer and take up less truck space. The T2 truss can easily span over 15m due to the three sided webbing and plate joins.

The T2 box truss integrates with all of ResX's standard rigging accessories like baseplates

2m span

45° corner

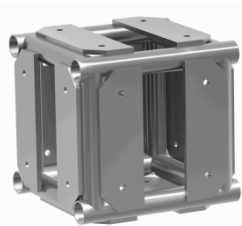

Available in	Weight
0.25m	7.1kg
0.3m	7.5kg
